

Job Title: Software Tester

Location: Remote

Employment Type: Full-Time

Responsibilities:

- Execute manual and automated test cases to ensure software quality.
- Identify, document, and track defects in a clear and concise manner.
- Collaborate with developers and stakeholders to clarify requirements and ensure accurate testing.
- Perform regression testing to verify defect fixes and feature updates.
- Create and maintain test cases, test plans, and test scripts.

Required Skills:

- Strong understanding of manual testing methodologies.
- Proficiency in automation testing tools (e.g., Selenium, TestNG).
- Experience in writing and executing SQL queries.
- Familiarity with Agile testing processes.
- Excellent analytical and problem-solving skills.

Preferred Skills:

- Knowledge of performance testing tools (e.g., JMeter).
- Experience in API testing using tools like Postman.
- Basic understanding of CI/CD pipelines.
- Knowledge of version control tools (e.g., Git).
- Strong communication and teamwork skills.

Qualifications:

- Bachelor's degree in Computer Science or a related field.
- 2+ years of experience in software testing.
